Flint, TX 75762

To whom it may concern,

We recently contracted with James Wilson at Wilson Homes to build us a new house in the Flint, TX area. Our old house, where we had been living for the last several years was completely destroyed by a fire, so needless to say we were very skeptical and concerned about who would build our new home. Losing everything was a very traumatic time for us and we were expected to start construction of a new house right away if we did not buy an existing house, as per our insurance company. After interviewing several builders we chose Wilson Homes.

We could have not made a better choice! James and Julie are wonderful to work with and made our building experience, after such a devastating loss, a joyful and blessed one. When choosing a builder one must rely on references and their trust and instinct for the individual responsible for constructing the home. Everyone wants a beautiful, well constructed and safe home to live in, that is built within budget and in a reasonable time frame. Wilson Homes provided all of this and more! I have been in the construction industry for over 35 years and I feel we received the utmost value for the money we spent to build our home. The sub contractors were professional, courteous and very efficient and all came in on budget and on schedule.

I would not hesitate, as indicated in this letter, to personally recommend Wilson Homes, and James Wilson to build a home for anyone. I now consider James and Julie not only our builders but our friends. Please feel free to contact me at any time via Wilson Homes if you would like any further information.

Yours Truly,

John Brindley
